DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of the record fails to teach a vibration motor comprising; a rotor having an unbalanced load, a stator having a plurality of coils having different phases respectively, a motor driver coupled with the coils and rotating said rotor, said motor driver including; a starting-circuit for applying starting torque to said vibration motor, a back-electro-motive-force (BEMF)-detecting circuit for detecting BEMF of each phase of said vibration motor and outpacing a BEMF detecting signal corresponding to the BEMF; an output-driving circuit having, a timing-generating circuit for producing at least one signal to switch an ON-OFF state sequentially for the coils based on the BEMF detecting signal, a speed-controlling circuit having a reference-cycle generating circuit for generating a reference cycle signal and a cycle-comparing circuit for comparing a cycle of the reference cycle signal with a cycle of the BEMF detecting signal so that an ON-OFF period to power said coils is effected responsive to output from said speed controlling circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
